

## For Windows users

### Access to the ftp site

Open your "My Computer" or any Explorer window (not Internet Explorer).

1. Enter the following in the Address Bar and hit enter:

ftp.orr.noaa.gov/Deepwater\_Horizon\_Ext/DataDiscoveryTeam/SpatialData/SCAT/

NOTE - you might receive an error message at this point. Just click "OK".

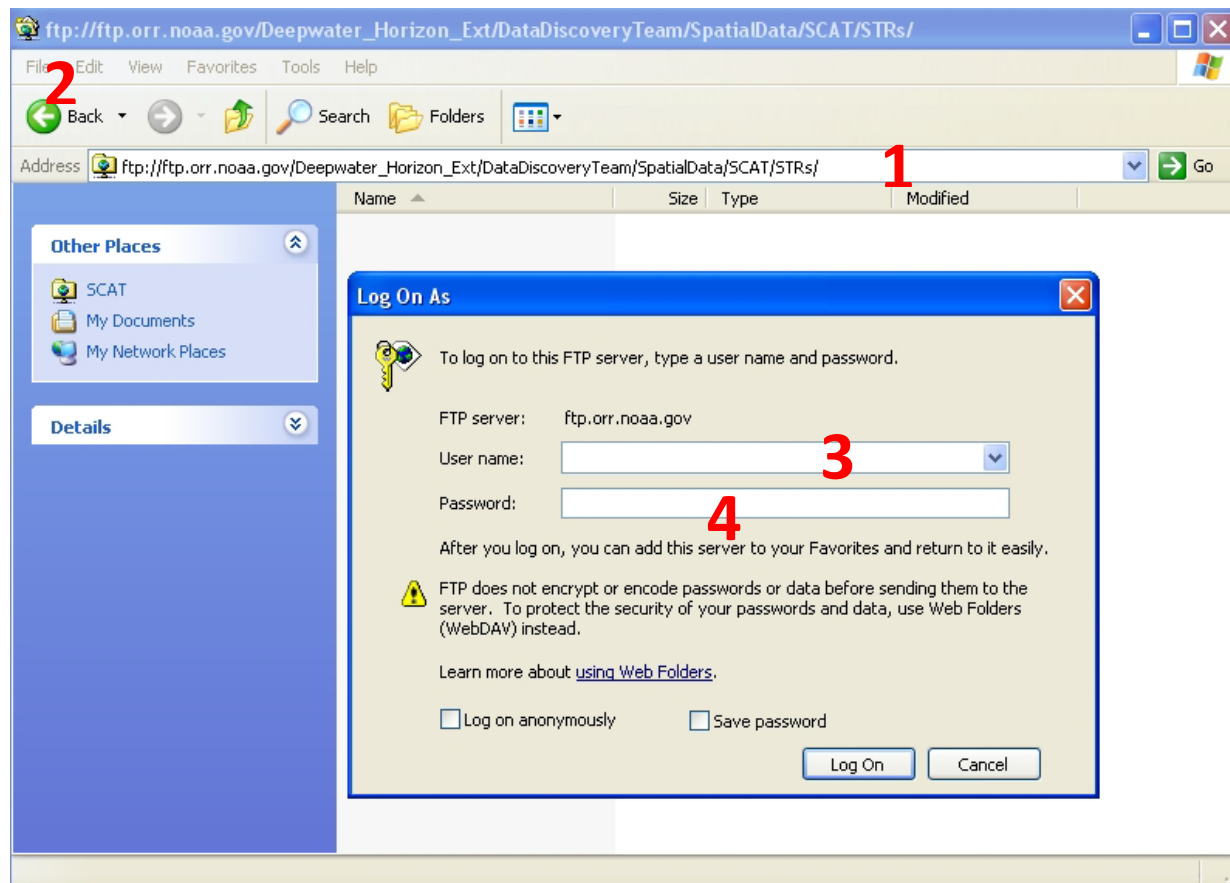

2. Under "File" select "Login As"

3. Username = deepwater

4. Password = deepwater2010!!

5. This will take you directly to the SCAT folder

You can then navigate around the folders to find files you are looking for, and you can copy them to your local machine.

### Directory Structure

Currently, there are "Maps" and "STR" directories.

The "Maps" directory contains PDF and shapefile products.

The "STR" directory is structured by State> Division > Segment to locate the appropriate data.

Folders and files will be added to the STRs directory as data is generated from surveys and cleaning activity. The absence of an area/folder in this FTP site indicates that there has been no SCAT survey required to date.
